The Orion Orbital Constellation Line of stretch wrappers are ideal for long loads that cannot be stretch wrapped on a conventional turntable or rotary tower type machine.

Products well suited for orbital wrapping include pipe, plastic extrusions, carpet rolls, lumber, aluminium siding, and other hard to wrap products. Stretch wrapping these loads using an Orion Orbital Constellation eliminates costly banding, strapping, and corrugated packaging.

Orion orbital ring sizes range from 15 inch to 90 inch, accommodating virtually all orbital wrapping applications. Other features of the Orion Orbital Constellation wrappers include versatility in carriage configuration, pre-stretch film carriage, RPM options, and a user-friendly programmable touchscreen HMI.

**FEATURES & BENEFITS**
- Ring sizes range from 15 inch to 90 inch
- Programmable HMI stores multiple wrap recipes, and provides diagnostics and troubleshooting information
- Machine settings allow additional wraps to reinforce specific parts of the load
- Powered prestretch film carriage delivers superior load containment and film savings
- Corner compensation feature applies film tension/pressure evenly to entire load
- Single or dual film carriage configurations
- Robust powered bridge conveyor customized for product
- Maximum weight capacity up to 4,000 pounds.

**APPLICATIONS**

- Carpet Rolls
- Siding
- Lumber and Flooring
- Pipes
## TYPICAL PRODUCT SPECIFICATIONS

## STANDARD FEATURES

**10” IntelleVue HMI**

Easy-to-use, password protected touch-screen HMI with Web based dashboard and Ethernet port for remote viewing of data & diagnostics.

**Insta-Thread Film Delivery**

Easy film loading and threading. Corner compensating carriage applies force evenly to all surfaces of the load.

**Powered Conveyor**

Unique powered bridge conveyor is customized based on your product shape, size and weight.
